

GUN SAFETY

Did you know...

of gun owners have at least one gun that is not secured.

Storage Practices of US Gun Owners in 2016.
American Public Health Association: March 2018

Accidental Shootings

Increased Risk of Suicide*

School Shootings

Stolen by Criminals

Kids and unsecured guns are a dangerous mix!

Always secure guns with a gun lock and store in a gun safe. Many towns offer free gun locks!

Before allowing kids to visit friends, check with the parents about their gun safety practices.

Talk with your kids about gun safety. The more they know, the less curious they'll be!

Hey, PARENTS!
Hey, KIDS!

Guns are dangerous!

They're not toys, and should never be used without training.

Always assume a gun is loaded and NEVER, EVER point it at anyone!

If your friends are playing with guns, LEAVE - and tell an adult about it. You could save someone's life.

If you're worried about being a snitch, send an anonymous note.
